#### Description

In Magicuser API the system retrieves all magicusers if request is unauthorized.

#### Steps:

1. Send **GET** request to url:

https://cerebrumhubcrmlite.bubbleapps.io/api/1.1/obj/magicuser

## Expected result:

If request is unauthorized the system should not retrieve any response expect an appropriate error message: "You do not have permission!"

### Actual result:

The system retrieves all magicusers in the list.
